DARSHAN SATAPARA

+91 7203835504 darshansatapara286@gmail.com Portfolio Linkedin Leetcode GitHub

Full-stack engineer building scalable web applications and high-volume data pipelines using React, Node.js, and Python. Driving business efficiency by architecting AI-powered automation suites, OCR systems, and LLM workflows to eliminate manual bottlenecks.Passionate podcaster and group discussion host, bringing strong communication skills and a highly collaborative mindset to fast-paced teams.

WORK EXPERIENCE

Full Stack Developer, Soni & Soni Advocate & Attorney **Jul 2026 - Present**

- Built internal systems for endpoint security, hearing automation, secure data management, and business data enrichment using Rust, Python, Node.js and React.
- Developed the firm's website and lead-management system, along with automation workflows for internal operations and communication.

Intern - Backend & Python Developer, 7Span **Jan 2026 - jul 2026**

- Automated PDF parsing using OCR, OpenAI and Mistral AI, and developed a scalable Node.js backend with secure AWS S3 asset sharing.
- Developed a scalable client-agency platform backend using Node.js, implementing secure design asset-sharing via AWS S3.

Intern - Full-Stack Developer, instabizweb **Sep 2025 - Dec 2025**

- Collaborated on "Instant Dukaan," a SaaS platform enabling local retail shops to rapidly deploy their online eCommerce storefronts. **InstantDukaan**
- Contributed to the development of "Blutec Ping," optimizing backend workflows for a bulk WhatsApp messaging service. **Ping**
- Assisted in building a Google Maps-based lead generation tool to streamline automated B2B data extraction and client discovery. **Scout**

Intern - Full-Stack Developer, Egniol Services Private Limited **May 2025 - Jul 2025**

- Consolidated complex architecture across 8-10 databases and 30+ interconnected tables containing 15+ million records.Made a centralized master data tables, completely eliminating the performance overhead of resource-heavy, multi-join queries.
- Automated business workflows using Python: WhatsApp broadcasts(Ultramsg Api), Specific Domain new scrapper and Google review checkers.

Intern - Full-Stack Developer, Webseeder Technologies Private Limited **Feb 2025 - Apr 2025**

- Engineered a full-stack eCommerce platform with secure Razorpay integration and robust admin management controls.
- Co-developed a MERN-stack task management system to isolate and streamline multi-team project workflows.

PROJECTS

Blutec Ping | Node.js, Express.js, WhatsApp API, MongoDB **Ping**

- Optimized backend workflows for a bulk WhatsApp messaging service, significantly improving message delivery speed for enterprise clients.
- Integrated the WhatsApp API to handle high-volume message queues, ensuring scalable and reliable automated communications.
- Streamlined API response times and database queries, enabling local businesses to execute large-scale marketing broadcasts efficiently.

Security & Activity Monitoring System | Rust, Python, React.js, Node.js, System APIs

- Built a system that automatically starts with the device and monitors browser/app activity, usage time, USB activity, and data transfers.
- Added 15-minute screenshots, system wake/sleep tracking, and a central admin panel for activity and analytics.
- Used Rust for system-level monitoring and security-focused components, with the overall architecture and implementation handled end-to-end.

Instant Dukaan | React.js, Node.js, Express.js, MongoDB,SQL, SaaS Architecture **InstantDukaan**

- Collaborated on a scalable SaaS platform empowering local retail shops to rapidly deploy customized online eCommerce storefronts.
- Engineered responsive frontend components and robust backend APIs, accelerating the merchant onboarding process,dynamic inventory management features to support multi-tenant store operations.

Soni And Soni Website | Next.js, React.js, Node.js, Database, Admin Panel **Live Link**

- Built a new professional website for Soni & Soni, focusing on the firm's brand, services, and online presence.
- Added lead-generation and enquiry workflows so potential clients can connect with the firm directly.
- Developed an admin panel to manage incoming leads and keep the lead-handling process organized.

Hearing Alert | Python, Node.js, React.js, Email APIs, WhatsApp API, Automation

- Built an automated system that reads emails, identifies hearing dates and case details, and processes the relevant information.
- Automated WhatsApp and email alerts to notify the appropriate team members about upcoming hearings.
- Added a central admin panel to manage hearing information and give the team advance visibility, reducing manual tracking.

Vault | Rust, Node.js, React.js, Passkeys, Authenticator, Secure Storage

- Built a secure vault for storing passwords, credentials, and sensitive documents with multiple layers of access protection.
- Added Passkeys, authenticator-based verification, secure sharing, and Rust-based security components to protect sensitive data.
- Designed a centralized admin system where data remains inaccessible without the required keys/credentials, with no insecure recovery path for lost access.

Mahendra Ke Namkeen | Next.js, React.js, Node.js, MongoDB, Razorpay API **Mahendra Ke Namkeen**

- Worked on B2C eCommerce platform featuring optimized user interfaces and a dedicated admin panel.
- Integrated the Razorpay API to process seamless, secure payments and implemented robust authentication flows for user accounts.
- Engineered a powerful backend to efficiently manage live orders, user data, and platform analytics, driving real-world revenue.

AI-Powered OCR Pipeline | Node.js, Python, OpenAI API, Mistral AI, Directus **Github**

- Engineered an automated data extraction pipeline converting unstructured PDF brochures into database-ready JSON.
- Integrated OpenAI and Mistral AI APIs and try different OCRs(AWS,Azure,Mineru,Mistral) to intelligently parse complex document layouts and daily itineraries with high accuracy.
- Seamlessly synced processed data directly into a Directus headless CMS, reducing manual data entry bottlenecks by over 80%.

SKILLS

- **Programming Languages** : C++, Python, JavaScript,Rust
- **Backend Development** : Node.js, Express.js, Fast API, Directus, Supabase
- **Frontend Development** : React.js, Next.js, Streamlit, HTML, CSS, Tailwind CSS , Bootstrap
- **Databases** : MySQL, MongoDB, PostgreSql, Redis
- **Version Control & Collaboration & Server** : Git, GitHub, GitHub Action, Hostinger VPS, AWS, NginX
- **Core Skills** : Problem Solving, RESTful API Design, Database Design , Leadership
- **Others** : WhatsApp broadcasting, WhatsApp API, Google sheet API, Google Cloud & its Filters , Twilio, Ultra message,blutec ping, visity.ai.

EDUCATION

B.Tech (Computer Engineering)
Silver Oak University(2022-26)
CGPA : 9.30

CERTIFICATE

- **Data Science With Python** Batweb Group of Companies
- **Data Analytics Job Simulation** Deloitte
